

MODULE B – AREA OF REVIEW AND CORRECTIVE ACTION PLAN

GSDT TAB: ROCK PROPERTIES

Porosity Distribution Image Files

A detailed discussion on the porosity inputs into the model are contained in “Section 3.3 – Porosity” of the “*Area of Review and Corrective Action Plan*” technical report. This section details methodology to determine the porosity values assigned in the numerical model.

The porosity was distributed spatially in the static model, and then imported for use into the dynamic model.

Figures showing the porosity distributions for each layer in the model are presented as Figure 10 thru 22 in the “*Area of Review and Corrective Action Plan*” technical report.

Please Note: The “*Area of Review and Corrective Action Plan*” technical report and associated figures, tables, and appendices, has been submitted as Confidential Business Information (CBI). This document has been submitted to meet the requirements of the “Rock Properties” tab in Module B of the Geologic Sequestration Data Tool (GSDT).
